WALLONIA EXPORT & INVESTMENT AGENCY

The Wallonia Export & Investment Agency (AWEX) is the institution in charge of the development and management of Wallonia's domestic and international economic relations.

Through a personalized, innovative, and sustainable approach, AWEX supports Walloon companies - regardless of their size, sector, or target market - in every step of their international endeavors. This includes exports, technological partnerships, and development abroad.

The agency's vast network of connections ensures the best advisors are always by your side. Our local anchors and agents abroad are capable of providing unparalleled insight to take your company to the next level. In addition, our connections will help establish your business in the global marketplace and promote it throughout the world. Training, incentives, and international financing are also available.

AWEX is also committed to strengthening Wallonia's position as the premier gateway for international investors seeking success in the heart of Europe. We work closely with them to inform, convince, and advise in every stage of their development.

Feel free to get in touch with one of our local or international agents via our websites listed above.

In our network of more than 400 employees in nearly 100 countries around the world, there is always someone ready and willing to support you in your approach.

FLANDERS INVESTMENT & TRADE

Flanders Investment & Trade agency promotes sustainable international business, in the interest of both Flanders-based companies and overseas enterprises. Whatever sector you are involved in, Flanders Investment & Trade will help you establish contact with the Flemish companies you are looking for. This includes not only products or services you may be sourcing, but also various types of business relationships, from joint ventures to technology transfers.

At another level Flanders Investment & Trade enhances Flanders' position as the gateway to Europe for inward investors. The Agency identifies, informs, advises and supports overseas enterprises by establishing production and research facilities, contact centers, headquarters, logistics operations and the like in Flanders, the northern region of Belgium.

This broad focus on international entrepreneurship, involving outward trade as well as inward investments, requires not only a thorough knowledge of Flemish economy, but also an extensive network outside of Flanders. We have just that for you. Do visit our website and discover our worldwide network.

lydie@alan.be

COMPANY BACKGROUND

Founded in 1980 in Verviers, Alan&Co was, at that time, only active in the dental sector. The company then expanded its activities to other sectors such as the medical, the cosmetic and the veterinary sectors. The company now generates over 98% of its turnover in more than 40 different countries.

ADDED VALUE

One of the most important values for Alan&Co is to remain flexible in all aspects. The company is keen to continue its development by offering a diversified range of products, of European quality and adapted to the needs of its customers. Alan&Co also remains sensitive to ecology and the environment by using ethical and ecological raw materials.

RANGE OF PRODUCTS

Alan&Co offers a wide range of products tailored to customers' needs. The products come in different shapes and can be made from hydro-stretched cotton, absorbent or non-absorbent, cotton/viscose blends or ORGANIC cotton. The range includes products such as: cotton wools; cotton rolls; ZigZag cotton wool; bandage rolls; cotton pads; cotton buds; sutures; bibs and napkins; sterile blister packs,

MAIN REFERENCES

Single-use cotton products (cotton rolls, zig-zag wadding, cotton pads, cotton wools)

CERTIFICATION

ISO 13485, CE marked devices meeting European Pharmacopoeia Standards.

sebastien.goenen@corisbio.com

COMPANY BACKGROUND

Coris BioConcept is a leading expert of rapid in vitro diagnostics of human infectious diseases since 1996. Based in Belgium, the company develops, produces and markets IVD kits for various pathogens mainly based on the immunochromatographic technology (ICT) aka Lateral Flow technology. Coris BioConcept has also developed a range of assays (RESIST) for rapid detection of antibiotic resistance mechanisms.

ADDED VALUE

Coris masters the whole chain from R&D to manufacturing and marketing innovative diagnostics. Coris innovation and professionalism over the years enable them to maintain and continuously grow its distribution network. Coris develops diagnostics for third parties on demand.

RANGE OF PRODUCTS

Detection of human respiratory, gastro-enteric and blood-borne pathogens (bacteria, viruses and parasites).
Detection of antibiotic resistance markers (RESIST range).
Custom development service of client-specific lateral flow devices (including veterinary).

COMPANY BACKGROUND

DiAgam is a European company, with more than 30 years of experience, which manufactures Turbidimetric Specific Protein reagents. Our operations are ensured through our direct affiliates in Belgium, France, Spain, Portugal and Brazil. We also export in ASEAN, EMAE, LATAM and US markets.

ADDED VALUE

Recognized as a very good quality assays, our leading innovative solutions are offered in user friendly instrument specific packaging for open chemistry systems from world leading instrument manufacturers including Abbott, Beckman Coulter, Siemens, Ortho Clinical Diagnostics or Roche*. These end-finished packaging kits save operator time and improve laboratory efficiency by eliminating reagent transfer. Our solutions are also available in OEM for any distributor which is looking for a high-quality Specific Protein reagents menu.

RANGE OF PRODUCTS

Assays available:
Albumin (immunological), Albumin in Csf, Alpha-1-acid glycoprotein, Alpha-1-antitrypsin, Alpha-1-microglobulin, Alpha-2-macroglobulin, Beta-2-microglobulin, Apolipoprotein A1, Apolipoprotein B, ASO, Calprotectin, Complement C3, Complement C4, Ceruloplasmin, CRP, Haptoglobin, Ig A, Ig E, Ig G, Ig G in Csf, Ig M, Lipoprotein(a), Microalbumin, Prealbumin, Rheumatoid Factor, RBP, Transferrin.

Jérôme Cornu / CEO
jerome.cornu@e-proteins.com

COMPANY BACKGROUND

e-proteins, is the worldwide leader in producing biotin-binding protein technologies, drives innovation through the development of advanced derivatives of the (strep)avidin family. e-proteins meet and exceed market demands by providing cutting-edge biotin-binding proteins that enhance medical diagnostics.

ADDED VALUE

The e-proteins products deliver superior biotin-binding performance, significantly enhancing both binding capacity and reverse binding ability. With advanced monomeric conjugates, e-proteins offer stronger signals, ensuring more reliable and sensitive diagnostic results. These innovations provide unmatched precision and efficiency in (strep)avidin-based technologies.

RANGE OF PRODUCTS

UltraCoat increases signal capacity by enhancing the number of biotin-binding sites. NitroAvidin improves reversible biotin binding, optimizing purification processes and SPR measurements. The Mono Disperse HRP enhances diagnostic precision with stronger HRP signals. Each product, elevates the performance of (strep)avidin-based applications.

COMPANY BACKGROUND

The Belgian company F Care Systems has been developing medical and aesthetic equipment utilising radiofrequency since 2001. F Care Systems now has thriving branch offices in France, Germany, the United States and Hong Kong, along with a partner network stretching across the globe.

ADDED VALUE

With an emphasis on safety, reliability and efficiency we strive to improve the health and comfort of patients, worldwide. Every innovation that F Care Systems brings to market aims to create minimal disruption to the patient's daily life whilst having maximum positive therapeutic impact on it.

RANGE OF PRODUCTS

Our core business is radiofrequency energy, with an emphasis on minimally invasive solutions that provide lasting results with minimal downtime. We offer a range of versatile, intuitive monopolar RF generators and related consumables for treating numerous conditions in proctology, oncology and vascular surgery.

DELEGATE(S) AT THE EXHIBITION

Tom Massy / Sales & Marketing
tom@innolabel.eu

COMPANY BACKGROUND

Innolabel is a Belgian company founded in 2010 by Chris van Sebroeck. Innolabel provides innovative solutions that help companies measure and control their complete cold chain. Think of smart labels, data loggers and complete automated systems.

ADDED VALUE

Innolabel works solution based and not product based. This means that they always will provide the best fitting solution for each project, even when the product doesn't exist yet. In that case Innolabel will discuss with their wide range of partners to create a new reliable solution.

RANGE OF PRODUCTS

To measure all the different parameters (temperature, humidity, light, shock, location,...) that can have an impact on your cold chain, Innolabel works with three kinds of products. From smart labels, to real-time data loggers and complete automated systems for fixed structures.

DELEGATE(S) AT THE EXHIBITION

Carina Borg

COMPANY BACKGROUND

Watcherr delivers innovative SaaS and AI to nursing homes, hospitals and people at home through an integrated system of software and hardware. The system continuously monitors the user to identify irregular (health) patterns to predict, report and prevent emergencies. Our mission is to act with Watcherr as a first-line responder, even before the zero-line responder, to detect anomalies in (health) patterns and warn zero and first-line responders to prevent emergencies. For example, the platform can refer caregivers/users to a first-line care provider or, if necessary, to more specific second- or third-line specialists who can monitor the deviations.

RANGE OF PRODUCTS

The Watcherr system is a wearable device that monitors health patterns, tracks user location and detects falls. If there is a deviation, the healthcare provider will be informed via the mobile App. This allows to react proactively to critical health problems. The Watcherr system is also a basic nurse call system, where a person in need of care can alert the healthcare staff with the push of a wristwatch. The warning contains information about a user's health risks at an early stage and about the location. We only deliver this innovative AI health solution B2B and are already working with various partners for the B2B2C market today. Our target group is residential care centres, service flats, hospitals, nursing companies, wholesalers of healthcare and people at home.

COMPANY BACKGROUND

After years of research and development of our R&D team, in collaboration with different Flemish universities, Yun developed groundbreaking patented biotech innovations. These innovations are helping to combat antibiotic resistance and help repair, protect and strengthen the microbiome, thereby promoting human & animal health.

ADDED VALUE

We are specialized in ProBioTherapy™, the patented application of adding beneficial microorganisms. YUN created effective solutions for common skin conditions such as acne, athlete's foot, female intimate hygiene, diaper dermatitis and atopic prone dermatitis. We are pioneers in the field, as we developed, amongst others, a first-ever methodology to apply live bacteria in water-based environments by a patented micro-encapsulation technique.

RANGE OF PRODUCTS

Skincare Solutions with ProBioTherapy™ for human & animals. YUN offers high-quality health products powered by YUNProBioTherapy™ Technology, designed for skincare. We offer products for acne prone skin, women intimate hygiene, athlete's foot, diaper dermatitis and atopic dermatitis prone skin.

Ready-To-Go Innovative Product Development

We provide probiotic solutions and microbiome safe products tailored for the healthcare & Cosmetics. Our partnerships focus on enhancing product portfolios with cutting-edge probiotic technologies.

MAIN REFERENCES

YUN developed solutions for common skin conditions, based on its groundbreaking technology to apply live bacteria in applications for human and animal health. Yun has different product ranges for; acne prone skin (ACN), athlete's foot (FNG), women's intimate hygiene (VGN) and baby care (BBY). In October 2024 Yun launched a new range for atopic prone skin (ATO).

COMPANY BACKGROUND

Medestime SA, a company based in Belgium since 1991, specialized in designing and manufacturing multi-directional and adjustable phototherapy system. Our Bilicrystal & Bilidoll were used to treat physiologic or acute jaundice in the newborn, whether born at term or prematurely.

ADDED VALUE

World class professional manufacturer of newborns care field, delivering good quality product with up to date technology and providing excellence and reliable service to improve the lives of newborns.

RANGE OF PRODUCTS

- BiliCrystal®IV.3/ Duo.3/ Mono.3/ Trans.3
- BiliDoll®

Intensive phototherapy System for 360° treatment of baby in mother's room and / or Pediatrics / Neonatology units

CERTIFICATION

In August 2024, we have passed ISO13485 audit. Now we are in the process of updating the CE certificate, hopefully to get the new CE by the end of the year.

COMPANY BACKGROUND

With 35+ years of experience, Medical devices companies will find with DELTATEC a key OEM electronic partner for their most complex challenges in medical imaging: High-speed camera, High-resolution video capture, Low latency video transport, Artificial intelligence, High-performance video servers.

ADDED VALUE

Why DELTATEC ? We have more than 35 years of video experience. We are a human sized company that is driven by innovation. Thanks to our expertise in medtech, aerospace, TV broadcasting, ProAV industries and many other markets requiring video or imaging, we know how to achieve the highest quality standards: from electronic design to prototyping and manufacturing.

COMPANY BACKGROUND

Established since 1950 in Mouscron, Feronyl is the manufacturing specialist of mechanical lightweight components. In 2012, the company became affiliated with three other companies to create a family business of advanced manufacturing capabilities in high precision areas: Sub-Alliance.

ADDED VALUE

Feronyl provides a team of engineers to design and improve your product before launch and to follow your project through to completion and production. The company also works to strict standards to produce high quality products at the right cost with short delivery times. Through sustainable practices, Feronyl managed to reduce its product and process environmental footprint.

RANGE OF PRODUCTS

Feronyl is specialized in the injection and development of technical plastic, metal and composite parts. It transforms all materials, even the most complex one such as PEEK, PEI, PPS, PSU, PA, ... The company targets all technological applications in polymers, composites, multi-materials (2K overmoulding) and powder materials for high-precision areas.

COMPANY BACKGROUND

The LASEA Group is the European leader in laser micromachining solutions. The Group, based in 6 sites worldwide offers solutions (for marking, engraving, cutting, drilling, welding or texturing) to high end industries such as medtech, luxury and electronics. LASEA. MAKING THE SMALLEST BIG DIFFERENCE.

ADDED VALUE

LASEA is a laser specialist which offers machines that can integrate both excimer or femtosecond laser technologies, in different wavelengths (UV, visible and IR). LASEA proposes standard or custom solutions with a wide range of options, such as a module that compensates the conicity of the laser to get 0° taper angle in cutting, drilling or engraving.

RANGE OF PRODUCTS

- Femtosecond, picosecond and nanosecond laser machines
- Excimer laser machines
- Modules for integrators
- Support, trainings and upgrades

MAIN REFERENCES

Most of LASEA's customers are confidential but LASEA counts within its clients the biggest companies in stents, catheters or implants manufacturing but also the most prestigious Universities worldwide.

COMPANY BACKGROUND

MAC Valves, Inc. is a global leader in fluidics. MAC Valves was founded in 1948 and amassed over 110 patents related to air & liquid valves. MAC Valves offers advanced technology valve and pump solutions to meet stringent customer requirements involved in life science.

ADDED VALUE

- Development of application dedicated valve solutions
- Flexible product line
- Ultra precise technology
- Manifold design and manufacturing

RANGE OF PRODUCTS

- 2-way & 3-way compact Bullet Valve® air version
- 2-way & 3-way compact Bullet Valve® liquid version
- High accuracy pump
- Proportional flow (or pressure) controllers

DELEGATE(S) AT THE EXHIBITION

Cédric VAN ROSSUM | CEO
Mobile : +32 475 229659
cvr@mirmexmotor.com

COMPANY BACKGROUND

Based in Belgium, Mirmex Motor was founded in 2017 following multiple years of research at UCLouvain. We specialize in designing and manufacturing small-size electric motors, actuators, and micro-generators, leveraging our proprietary, university-backed, and disruptive motor winding technology.

ADDED VALUE

Mirmex micromotors deliver unmatched performance density compared to the best Swiss, German, and American equivalents. They are based on a patented motor winding technology that offers infinite flexibility in terms of motor size and applications.

Developed in a university lab to address cost and customization limitations, Mirmex technology unlocks optimized, AI-built coil shapes that were previously impossible to create using established manufacturing methods.

RANGE OF PRODUCTS

- Small size electric motors for medical devices
- INTRA-BODY DC MOTORS
- Miniature MEDICAL ACTUators
- Micro-generators

MAIN REFERENCES

Numerous references in the medical, robotics, aerospace, industrial, and defence sectors.

CERTIFICATION

Mirmex Motor is an ISO13485 CERTIFIED COMPANY.

melanie.reuter@sterisys.eu

COMPANY BACKGROUND

Since 2008, STERISYS provides device manufacturers and contract sterilizers with turnkey ethylene oxide (EO) sterilization systems for the safe and efficient sterilization of medical devices. Moreover, we are specialized in the pharma industry with handling solutions for packed liquid pharmaceuticals.

ADDED VALUE

At STERISYS, we focus on the engineering and construction of customized sterilization equipment for the ethylene oxide (EO) vacuum and overpressure processes. Therefore, we provide our customers with support right from the beginning: from consulting on the sterilization process, to engineering, installation and commissioning at customer site, through to maintenance.

RANGE OF PRODUCTS

STERISYS offers equipment for the ethylene oxide (EO) vacuum and overpressure sterilization processes. Moreover, our systems can be equipped by preconditioning and degassing chambers, a gas treatment system, an EO monitoring system, automated conveyor systems and a SCADA based control system.

MAIN REFERENCES

As one of the leading manufacturers of EO sterilization equipment, we supply our flexible and innovative solutions to international medical device manufacturers and sterilization service providers.
